PROFESSIONAL SUMMARY

B.Tech Information Technology student with hands-on experience in frontend development, UI/UX design, digital marketing, and technical support. Skilled in HTML, CSS, JavaScript, Python, and Java with practical experience in responsive web design and frontend development. Experienced in creating digital solutions, managing branding projects, and contributing to AI-based application development. Passionate about software development, frontend technologies, and building user-focused applications.

CAREER OBJECTIVE

To secure an IT internship or entry-level software development role where I can apply my frontend, backend, programming, and problem-solving skills while continuously learning modern technologies and contributing to real-world software solutions. Highly motivated to explore AI-assisted development, software engineering, testing, and full-stack technologies with a strong willingness to learn and adapt quickly.

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

E.G.S. Pillay Engineering College, Nagapattinam

2022 – Present

CGPA: Approximately 7.0

Higher Secondary Education

R.C. Fathima Matriculation Higher Secondary School, Thiruvarur

2020 – 2022

TECHNICAL SKILLS

Programming Languages

- HTML
- CSS
- JavaScript

- Python
- Java
- SQL

Frontend & Web Technologies

- Responsive Web Design
- Frontend Development
- Basic UI/UX Principles
- Bootstrap

Tools & Platforms

- Figma
- Adobe Illustrator
- DaVinci Resolve
- CapCut
- VN Editor
- Adobe Audition
- HeavyM

Projects

Hospital Outpatient Management System

Technologies Used

HTML, CSS, JavaScript, Python, AI-based Summarization

Project Description

Developed a hospital outpatient management system designed to manage patient appointments, maintain doctor visit history, and improve healthcare workflow efficiency. Contributed significantly to frontend development, interface design, and system functionality.

Key Contributions

- Developed responsive frontend interfaces for patient and doctor management
- Designed appointment scheduling and patient history management modules
- Worked on AI-based summarization features for doctor consultation records
- Improved user experience through structured layouts and UI enhancements

Smart Print AI Intelligence

Project Description

Developed an AI-powered smart printing and delivery management solution designed to automate printing requests and streamline delivery operations.

Key Contributions

- Worked on system design and frontend interface development
- Assisted in workflow planning for automated printing operations
- Contributed to improving efficiency in print request handling and delivery tracking

INTERNSHIP & WORK EXPERIENCE

IT, Digital Marketing & Frontend Intern – Datanerdz.ai

July 2024 – Jan 2025

- Worked on frontend design and UI improvements
- Executed digital marketing campaigns and content planning
- Assisted in website layout enhancements and responsive design updates
- Collaborated with teams on branding and digital engagement strategies

Designing, Branding & Technical Support – E.G.S. Pillay Institutions

May 2022 – July 2024

- Managed institutional branding and digital content creation
- Supported frontend updates and visual layout improvements
- Assisted in IT-based event coordination and technical operations
- Designed promotional materials and digital assets

CERTIFICATIONS

- Mobile App Development
- Mentorship Certification

AREAS OF INTEREST

- Full Stack Development
- Frontend Development
- Backend Development
- Software Testing
- Web Technologies
- Artificial Intelligence Applications
- Digital Systems
- UI/UX Design

I hereby declare that the above information is true to the best of my knowledge.
